PACWEST brings the mill and research facility together effectively. G. Rodden. 7:13.  
 PAPER, people, progress will work together at PaperWeek. G. Rodden. 11:16.  
 PAPER MACHINE TECHNOLOGY. Papermaking improves pressing and drying methods. P.J. Greenbaum 3:37.  
 PAPER MACHINE. Optimizing paper machine dryer control - A case study. D. Nelson & T. Gardner. (T401) 11:43.  
 PAPERMAKING improves pressing and drying methods. P.J. Greenbaum 3:37.  
 PAPERWEEK creates an environment for the future. G. Rodden. 3:21.  
 PAPERWEEK. Paper, people, progress will work together at PaperWeek. G. Rodden. 11:16.

**PAPERWEEK:** The must-see event in 1997. G. Rodden. 12:28.

**PARTICULATE** emission reduction program for the kraft recovery boiler at Fletcher Challenge, Mackenzie, BC. D. Toews et al. (T380) 11:19.

**PERACID** delignification and bleaching of chemical pulps. Part II: Oxidation. N. Liebergott. (T104) 3:73.

**PERACID** delignification and bleaching of chemical pulps. Part I: Delignification. N. Liebergott. (T45) 2:21.

**PHOTOGRAMMETRY.** Close range photogrammetry: The future of as-built drawings. R. J. Powers. (T258) 8:17.

**POLYSULPHIDES.** In-situ production of polysulphide liquor in a kraft mill's causticizers. Part I: Pilot plant trials. V.C. Uloth et al. (T127) 4:38.

**POLYSULPHIDES.** In-situ production of polysulphide liquor in a kraft mill's causticizers. Part II: Process scale-up and economics. V.C. Uloth et al. (T169) 5:43.

**POSSIBILITIES** for upgrading woodcontaining papers by coating with a metered sized press. A.G. Hiorns et al. (T67) 2:43.

**PRAIRIE** grasses may be a Canadian fibre of the future. G. Rodden. 9:26.

**PRESENTERS** talk about cutting energy costs. C.A. Hoyte. 3:38.

**PRESSURE SCREENS.** The effect of rotor speed on the separation of coarse fibres in pressure screening with narrow slots. K. Repo et al. (T253) 7:67.

**PRESSURE SCREENS.** Fault detection for pressure screens. L.W. Estevez-Reyes et al. (T265) 8:24.

**PRESSURIZED** steam drying of sludge, bark and wood chips. A. Sloth Jensen. (T249) 7:61.

**PRINTABILITY.** Improvement of printability of mechanical grades with pre-calendering. J.D. McDonald, D.A. Twitchen, M.F. Foulger & J. Parisian. (T408) 11:50.

**PROCESS CONTROL.** Application of systems identification to paper machine model development and simulation. E.M. Heaven et al. (T138) 4:49.

**PROCESS CONTROL.** Competency in process control - industry guidelines. W.L. Bialkowski et al. (T155) 5:28.

**PROCESS CONTROL.** The future of distributed control systems. E.W. Leaver et al. 3:9.

**PROCESS CONTROL.** Computer simulation of drying paper by multiple techniques. J.F. Bond et al. (T433) 12:110.

**PULP & PAPER** hits the 'Net. N. McCubbin. 2:56.

**PULPING.** Many projects started by the Mechanical Wood-Pulps Network are ready for larger-scale trials. G. Rodden. 4:15.

**PULPING.** Mechanical pulping of commercial thinnings of six softwoods from New Brunswick. J.V. Hatton et al. (T420) 12:93.

**PULPSTONE DULLNESS.** Babic study of pulpstone dullness. B. Lonnberg, B. (T341) 10:27.

## Q

**QUALITY.** The stock quality monitor, a new approach to measuring fines. O.J. Kallmes et al. (T240) 7:52.

**QUALITY** improvements depend on what goes in the wet end. J. Bailey. 10:17.

## R

**R8/SVP-MeOH** efficiency measurement. M. Fredette et al. (T100) 3:68.

**RECAUSTICIZING.** The effects of bleach plant effluent recycle in kraft mill green liquors - Part I: Slaking & causticizing. B.M. Richardson et al. (T280) 8:42. Part II: Mud settling and filtration. (T315) 9:71.

**RECYCLING.** Waste reduction: A sound business decision. G. Rouleau et al. (T436) 12:114.

**RECYCLING.** A novel use of the dynamic sheet former in paper recycling (A). A.J. Hornig et al. (T450) 12:135.

**RECOVERY BOILER.** Fume chemistry, morphology and deposition in a kraft recovery boiler. A. Tavares et al. (T361) 10:51.

**RECOVERY BOILER.** Formation of low melting deposits in a modern kraft recovery boiler. N.J. Stead et al. (T442) 12:123.

**RECOVERY FURNACES.** Observations on the dynamics and efficiency of sootblowing in kraft recovery furnaces. Part I: Dynamics. V.C. Uloth et al. (T196) 6:59.

**RECOVERY FURNACES.** Observations on the dynamics and efficiency of sootblowing in kraft recovery furnaces. Part II: Efficiency. V.C. Uloth et al. (T223) 7:35.

**RECOVERY FURNACES.** Critical heat flux investigation for recovery boiler floor tubes. L. Olausson. (T276) 8:36.

**REDUCTANTS.** Comparing reducing agents in a pilot scale  $\text{ClO}_2$  generator: Does hydrogen peroxide measure up? B.A. Edwards. (T161) 5:34.

**REFINING.** TMP furnish development strategies: Part I: Fractionation and long fibre refining. S.R. Corson et al. (T446) 12:129.

**RESEARCH** relative to land application of pulp mill wastes in Alberta. T.M. Macyk. (T83) 3:48.

**REVIEW** and assessment of the ecological risks associated with the use of chlorine dioxide for the bleaching of pulp. K. Solomon et al. (T345) 10:35.

**RING** dryer: A new approach to waste reduction. L. Marchildon et al. (T212) 6:75.

**ROLL FINISHING.** Roll wrapping of pulp and paper with high performance stretch films. D. Climenhage et al. (T113) 4:24.

**ROLL MAINTENANCE.** Developments for the end of the machine. P.N. Williamson. 3:41.

**ROLL** wrapping of pulp and paper with high performance stretch films. D. Climenhage et al. (T113) 4:24.

## S

**SAFARI** shows off Finland's newest mill at Rauma. 6:16.

**SAFETY.** Emergency response planning. D.L. Holloway. (T384) 11:24.

**SAFETY.** Learn some valuable lessons from near miss incidents. G. Rodden. 12:21.

**SALTCAKE** free, on demand chlorine dioxide generation system - O1® generator. S.K. Mendiratta et al. (T469) 12:157.

**SESSION NOTEBOOK.** P & PC staff. 3:37.

**SEVEN** steps to chlorine freedom. M. Walters (T434) 12:119.

**SINGLE SFM** scheme needed says international panel. P.N. Williamson. 3:38.

**SINTERING** of calcined lime mud - the influence of carbon dioxide. J. Lindblom et al. (T355) 10:45.

**SLAKER** control at James MacLaren. R. Spring et al. (T461) 12:148.

**SLUDGE** characterization survey. W. Bunnage et al. (T4) 1:33.

**SLUDGE DISPOSAL.** Environmental considerations for landfill development in the pulp and paper industry. C. Russel et al. (T17) 1:51.

**SLUDGE SURVEY.** Sludge characterization survey. W. Bunnage et al. (T4) 1:33.

**SLUDGE.** Can fertilization with paper mill waste sludge threaten forest health and productivity? G.R. Stanosz et al. (T151) 5:24.

**SLUDGE.** Research relative to land application of pulp mill wastes in Alberta. T.M. Macyk. (T83) 3:48.

**SLUDGE.** Control strategies for activated sludge treatment plants. R. Ramamurthy et al. (T390) 11:32.

**SLUDGE.** Activated sludge treatment of kraft pulp mill effluent. J. Taylor. (T396) 11:38.

**SLUDGE.** Use of primary sludge as a mulch in the forest plantations. A. Lo et al. (T473) 12:161.

**SMALLER** is better. N. McCubbin. 12:156.

**SODIUM** chlorate shippers turn to aluminum hopper cars. 1:14.

**SODIUM** loss mechanisms and the formation of reduced sodium during the fast pyrolysis of kraft black liquor. S.A. Gairns et al. (T184) 6:46.

**SOFT-NIP** calendaring of offset LWC supercalender finish comparison. J.M. Groshek. (T227) 7:39.

**SPCI** covers all bases from mill to market, theoretical and practical. G. Rodden. 9:13.

**SPARKLING** ideas offered for bleaching. J. Lesser. 3:41.

**STEAM** and condensate diagnostic expert system. R. Amoyt et al. (T42) 2:18.

**STEAM POWER.** Full steam ahead for improvements. G. Rodden. 3:39.

**STOCK** quality monitor, a new approach to measuring fines. O.J. Kallmes et al. (T240) 7:52.

**STORA** leads the way with the announcement of a new paper mill. G. Rodden. 6:29.

**STRATEGIES** implemented during start-up of the activated sludge treatment system at Alberta-Pacific Forest Industries Inc. R.J. Butler et al. (T203) 6:66.

**SUBSTITUTION** of chlorine dioxide for chlorine in Canadian bleached chemical pulp mills. D.C. Pryke et al. (T1) 1:27.

**SULPHIDITY** reduction in kraft process. D. Montplaisir et al. (T8) 1:39.

**SURVIVAL** instinct turns Spruce Falls green. 1:18.

## T

**TAKE** advantage of industry resources. A. Lafleur. 3:35.

**TECHNICAL SECTION'S** 81st year in review. A. Lafleur et al. 3:22.

**TECHNOLOGIES** for the reduction of air pollution. D. Banks et al. (T367) 10:57.

**TMP.** Improvement of printability of mechanical grades with pre-calendering. J.D. McDonald, D.A. Twitchen, M.F. Foulger & J. Parisian. (T408) 11:50.

**TMP** furnish development strategies: Part I: Fractionation and long fibre refining. S.R. Corson et al. (T446) 12:129.

**TOWARDS** the optimization of multiple-stage bleaching processes: The case of peroxide brightening of CTMP. G. Pangalos. (T78) 3:42.

**TRADE SUPERVISION:** The 1990s and beyond. A. Demers. 10:8.

**TRAINING.** Virtual reality makes its pulp and paper debut at Repap New Brunswick. G. Rodden. 5:8.

**TRANSITION** metals and TMP bleaching. G. Rodden. 3:37.

**TRANSPORTATION.** Sodium chlorate shippers turn to aluminum hopper cars. P & PC. 1:14.

## U

**UNIFORÉT** rescues Port Cartier mill from oblivion. G. Rodden. 2:13.

**UPDATE** on process engineering software. N. McCubbin. 11:63.

**USE** of primary sludge as a mulch in the forest plantations. A. Lo et al. (T473) 12:161.

## V

**VALUE-ADDED** products are achieved with the metered size press. J. Bailey. 5:11.

**VIRTUAL** reality makes its pulp and paper debut at Repap New Brunswick. G. Rodden. 5:8.

## W

**WASTE MANAGEMENT.** The ring dryer: A new approach to waste reduction. L. Marchildon et al. (T212) 6:75.

**WASTE MANAGEMENT.** Conducting a waste audit and designing a waste reduction work plan. K. Ashwood et al. (T328) 9:84.

**WASTE REDUCTION:** A sound business decision. G. Rouleau et al. (T436) 12:114.

**WATER** and effluent management at Bowater Mersey. R.W. Wilson et al. (T273) 8:32.

**WATER REMOVAL.** Dewatering and consolidation of wet webs. I.I. Pikulik et al. (T58) 2:34.

**WOOD PITCH** deposition: Aluminum ions from kaolin pigments. R.E. Truitt et al. (T425) 12:99.

**WOODLANDS.** Single SFM scheme needed says international panel. P.N. Williamson. 3:38.

## Z

**ZERO** effluent is achievable. J. Bailey. 3:40.

**ZERO** process effluent discharge attained at St-Laurent Paperboard Inc., Matane, Quebec. S. Rousseau et al. (T302) 9:57.
